

KelatoVIT[®] performance

Vitamin and mineral supplement

**AVAILABLE
IN POWDER
OR PELLET**

Top Performance = KelatoVIT

KelatoVIT performance provides the vitamin and chelated mineral foundation performance horses need.

Vitamin and mineral deficiencies can be masked by the horse and often can be the underlying issue for illness, poor performance or poor digestion.

The Benefits

- ✓ Contains everything a racing or performance horse needs – can replace 2, 3 or more other products
- ✓ Contains chelated minerals for faster and more effective digestion into the bloodstream
- ✓ Improves performance and forward energy
- ✓ Maintains vigorous appetite
- ✓ Highly palatable pellets or powder
- ✓ Helps balance the diet where deficiencies exist
- ✓ Absorbable form of iron for the horse
- ✓ Provides better overall horse health

EXCELLENCE IN EQUINE PERFORMANCE AND HEALTH

- > Folic Acid
- > Calcium
- > Chromium
- > Copper
- > Cobalt
- > Iodine
- > Iron
- > Manganese
- > Magnesium
- > Phosphorous
- > Selenium
- > Zinc

HOW KelatoVIT WORKS

The unique combination of vitamins and minerals in **KelatoVIT performance** are absorbed into the gastrointestinal system and carried through the gut wall into the blood.

Vitamin and mineral deficiencies are common in Australian horses. The heavier the work, the higher the vitamin and mineral demands on the horse. Where there are deficiencies, **KelatoVIT performance** is absorbed to remedy this.

Vitamin and mineral deficiencies can be masked by the horse and often can be the underlying issue for illness or poor performance.

AVAILABLE SIZES

KelatoVIT performance is available in either a powder or pellet for your preference (both nutritionally the same):

- > 600g: provides up to 10 doses
- > 2kg: provides up to 33 doses
